-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☒ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3662

1. This application is in condition for allowance except for the following formal matters:

The specification describes a Figure 2. However, the instant Drawings include Figures 2A and 2B.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

2. The following is a statement of reasons for the indication of allowable subject matter:

Method claims 1-11 are allowable over the prior art of record by claiming a method for forming a plurality of beams from a reflected signal. The method includes applying a first weighting factor to a first value during a first portion of the time interval to generate a first resultant for a first beam for the first receiver element. A second weighting factor is applied to the first value during a second portion of the time interval, generating a second resultant for a second beam for the first receiver element. A third weighting factor is applied to the second value during a third portion of the time interval to generate a third resultant for a first beam for the second receiver element. A fourth

Art Unit: 3662

weighing factor is applied to a second value during a fourth portion of the time interval, generating a fourth resultant for a second beam for the second receiver element.

The first and third resultants are combined to generate a first beam, and the second and fourth resultants are combined to generate a second beam.

Apparatus claims 12-26 are allowable over the prior art of record by claiming a system which includes a time division multiplexer for sequentially applying first and second weighting factors to a first value to generate first and second resultants for forming first and second beams, respectively. The time division multiplexer sequentially applies third and fourth weighting factors to a second value to generate third and fourth resultants for forming the first and second beams. A combiner combines the first and third resultants and the second and fourth resultants for forming the first and second beams, respectively.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ian J. Lobo whose telephone number is (571) 272-6974. The examiner can normally be reached on Monday - Friday, 6:30 - 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas H. Tarcza can be reached on (571) 272-6979. The fax phone
